

MEITLER
CATTLE COMPANY

**MATERNAL
BULL & FEMALE SALE**

APRIL 12, 2025

1 PM AT THE RANCH
LUCAS, KANSAS

MEITLER

CATTLE COMPANY

Welcome to Meitler Cattle Company

We would like to invite you to join us April 12th at 1:00 pm at the ranch for our annual Meitler Maternal Bull and Female Sale. We would like to thank our long-time customers for their belief in our program. To those that may be finding us for the first time, we thank you for your interest and hope you like what you see. All of the cattle in the sale are home raised and are backed by generations of Meitler maternal Hereford and Angus cattle. We welcome anyone to come visit and see the cattle prior to sale day. Pictures and videos can be viewed at dvauction.com. The cattle will also be on display April 12th.

The bulls have all been semen tested and are ready to go to work. We have grown them slowly to insure soundness and longevity. It's bred in not fed in. What an exciting time to be in the cattle business! With record feeder prices and the expansion of the country's cowherd set to begin, we believe these bulls can have tremendous value to you. Whether you plan to keep your own replacement heifers or market them, our bulls will put you in prime position. The steers they sire will also demand a premium at marketing time. The bulls will sell in lot order.

Again, this year we will be offering F-1 black baldy heifer pairs, fall bred black baldy heifers, and open black baldy replacement heifers for sale. These females will add maternal excellence to any cowherd. They will be low input females that are bred to be fantastic momma cows.

Once again, we thank you for your interest in our breeding program and hope to see you April 12th at the ranch.

CLINT, ERIKA, TREY, REID, TY MEITLER

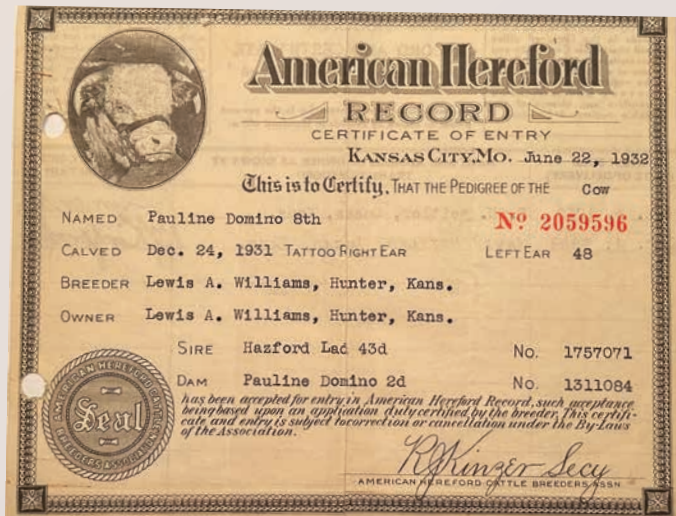

DARRIS, STACEY, JAYDEN, JAXSON MEITLER

OUR HISTORY

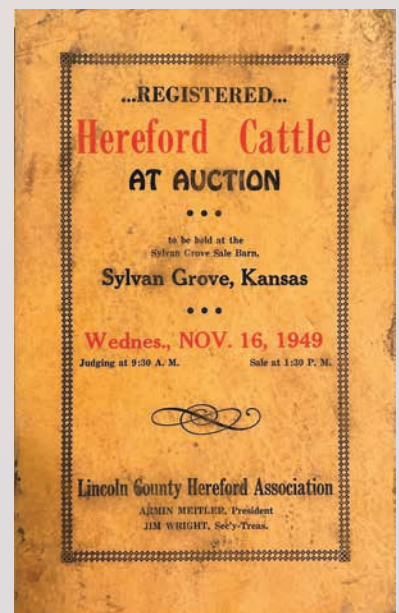

Meitler Cattle has been in the family for five generations. August Meitler homesteaded in North Central Kansas in the 1880's. His son Fred and grandson Armin farmed and raised cattle for many years. Armin started in the registered Hereford business in 1932. Armin passed his love for Hereford cattle on to his son, Gene. Gene's life passion was the genetics behind his pursuit of the perfect Hereford female. In the 1970's, Gene went into some of the great Line 1 cow herds in Montana searching for the power cow families. He purchased older cows that had been proven in the famous herds. His photographic memory of pedigrees and cows was like a superpower. He researched to find the common ancestors that were most potent in carrying the maternal traits he desired. Gene then linebred these cow families more and more intensely. Many fell out over time. The ones that succeeded the environmental and linebreeding pressure continued on the ranch.

What Gene ultimately created was one of the great maternal cow herds in the country. He became widely respected for his knowledge in linebreeding and Bonsma trait selection. As the cattle industry chased terminal traits, show ring banners, and EPD numbers, Gene never wavered in his belief of breeding maternal cattle. Start with the momma cow and the rest will fall in place. In 1986, Jim McDowell and Bow Creek Angus brought the first Angus cattle to the ranch. These Angus cows are the foundation of the angus genetics within the herd today. Present day owners of Meitler Cattle are Gene's two sons Darris and Clint Meitler. Today the cowherd is comprised of over 600 Horned Hereford, Angus and Black Baldy cows both spring and fall calving.

The purebred Hereford and Angus heifers are kept as replacements, and the black baldies are marketed with their superior maternal genetics from both breeds. Only the very best bulls are kept and sold or used back into the herd. Steers are sold at a premium for their quality and uniformity. The cowherd has expanded over the years, but the maternal core has remained constant. Our longstanding program is simply based on the mother cow. Maternal, feminine, good uddered, docile, long-lasting cows. Carefully selecting the correct maternal genetics to bring into the herd is always top priority. Our program was built on generations of hard work and grit. Our cows are built on this same foundation to work hard and stand the test of time.

ARMIN MEITLER, AT AGE 20, PURCHASED TWO REGISTERED YEARLING HEIFERS IN 1932 FROM LEWIS WILLIAMS FOR \$35.00 EACH. PAULINE DOMINO 8 WAS ONE OF THOSE COWS. THIS IS HER REGISTRY PAPER.

ARMIN MEITLER, PRESIDENT OF THE LINCOLN COUNTY HEREFORD ASSOCIATION. 1949

GENE MEITLER (FAR RIGHT) 1982

We partnered with Granzow Herefords (KS) to purchase 9164G in the 2020 Cooper (MT) sale. He was purchased for his unmatched maternal pedigree. We now have many daughters in production and they are exactly what we expected them to be. Feminine with beautiful udders. We are just as excited about his sons. As you will see, they are very complete maternal bulls. Dad always told us that you don't really know how good a bull is until he is gone. His daughters and granddaughters will ultimately tell his story. We have always believed this to be true, but 9164G is certainly putting this theory to the test. Simply put, he is improving our cowherd right before our eyes. We believe the 9164G sons will carry on his tremendous maternal traits. He has been used AI across the country with great success.
 Semen for sale.

• BW 86

• 340A is an outstanding herd bull prospect. He is very athletic on the move and has the maternal look we strive for. His 9-year-old mother, #632, is one of our best. As one Hereford breeder said when he saw her on pasture last summer "Who's that? That's a Gene Meitler cow right there!" We agree, she is the model Meitler cow. When it comes to our program, 340A is the tip of the spear.

• As we expected, breeding 9164G to our 1122Y daughters has produced excellent results. 8 sons of this mating are in this year's sale. 330A is also a grandson of our great #176 cow. A maternal pedigree second to none and he has the phenotype to go with it. Long sided with plenty of muscle, he is impressive.

• BW 80

• 332A is the full brother to our Lot 1 bull last year. His mother, #927, raised him at 14 years old still calving in the first cycle. Moderate framed, easy conditioning, with a flawless udder, she was at the top of our cowherd for over a decade. We are currently using two sons of the grand old cow ourselves. A 4-year-old full brother to 332A and our #700 herd sire is an 8-year-old son of 5110R. 332A was her last calf. He is a really well-made bull that has tremendous maternal genetics.

• 339A is a fancy Angus bull that is sired by our longtime Herd Sire PR Advance 3089. We have sold many sons of 3089 over the years. He serviced 23 cows at 10 years of age, not many Angus bulls can make that claim. The dam of 339A is our BC Blueblood Lady 137. She is now 14 years old and still producing. We flushed her last summer and are excited about her future progeny. We have kept and used several full brothers to 339A on Hereford cows. Here is a true maternal Angus bull with rare longevity bred in. 84-pound birthweight but could be used on larger framed heifers.

35 - F-1 BLACK BALDY HEIFER PAIRS

These heifer pairs really represent what our breeding program is all about, maternal females. They are what our bulls will produce, and what the fall-bred heifers and open replacement heifers will become. Feminine, good uddered, easy conditioning, long lasting momma cows. Females like this don't happen overnight, it takes time. We believe that fertility, longevity, and hybrid vigor are what the commercial cowherd needs above all else. These heifer pairs check all those boxes. Recips in a registered herd, a terminal cross program, maternal breeding program, or a grass finish operation, their possibilities are endless.

The calves are sired by three of our maternal Angus heifer bulls. The bull calves have been banded and the heifers will be replacement quality. The calves are February/March born. (calving list provided sale day) The heifers have not been exposed back and sell open, ready to breed. They carry no brands and will sell in groups of 5.

Calves are sired by:

- JBob Emulation 190 - AAA 20284604
- V-Bar Nightwatch 692K - AAA 20417398
- V-Bar Paxton 627K - AAA 20420119

55 - BLACK AND BLACK BALDY FALL BRED HEIFERS

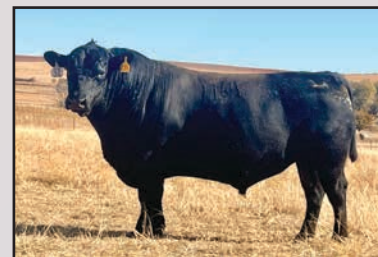

A fancy set of home raised fall bred heifers. True fall born and fall bred heifers are hard to find. Heifers that come from a maternal first cow herd, even harder. Developing and breeding fall heifers can be challenging, especially when they are not pushed. These bred heifers have been developed in a way that will insure their longevity as maternal range cows. The hard part is done, just put them on the green grass and watch them take off! Bulls were turned in November 22nd for a September 1st start and pulled 80

days later. They are bred to low birthweight Registered Angus bulls. The blacks and black baldies will be sold separately. They have been OCHV'd, pelvic examined, and carry no brands. Will sell in groups of 5.

Bulls they are bred to:

- JBob Emulation 190 - AAA 20284604
- V-Bar Nightwatch 692K - AAA 20417398
- SVR Emulation 31 King 1164J - AAA 20471105

SVR EMULATION 31 KING 1164J

70 - BLACK AND BLACK BALDY OPEN REPLACEMENT HEIFERS

These replacement heifers are all home raised and are backed by generations of maternal Hereford and Angus cattle. The heifer pairs are proof of what these heifers will grow into. They will be moderate framed, feminine, and good uddered. Past buyers have had great results breeding our heifers. Fertile and long lasting. These heifers have been OCHV'd, pelvic examined, have had no implants, and carry no brands. Sell open, ready to breed. Born February/March 2024. Will sell in groups of 5.

THANK YOU

Real time bidding & proxy bidding available.

ACCOMMODATIONS

Fossil Creek Hotel & Suites, Russell, KS	785-483-4200
Midland Hotel, Wilson, KS	785-658-2284

HEALTH

All cattle will sell with official health certificates. Heifers have been calfhood vaccinated. Fall Bred Heifers were pregnancy checked 3/25/25. Bulls have been semen and trich tested by Ellsworth Animal Hospital.

GUARANTEE

All bulls are guaranteed to be breeders. Bulls selling for \$5,000 or more are guaranteed against breeding injury for the first breeding season, which is defined as the 90 day period following the first turnout of the bull. If a replacement bull is available, he will be provided, or if the buyer prefers, credit will be given toward a bull at the following year's sale, less salvage value of the injured bull. Notification must be given to Clint Meitler prior to selling injured bull.

DELIVERY

No delivery terms are offered on the bulls or females. Delivery on the animals will be at buyer's expense, but we will help assist with the delivery as best we can. If possible, bulls are to be delivered within 21 days of sale.

REGISTRATION AND TRANSFER

Registration certificates will be transferred to buyers upon request at seller's expense. At time of settlement, buyers must complete information.

LIABILITY

All persons attending sale do so at their own risk. Neither the owners or any person associated with the sale, assumes any liability, legal or otherwise.
