

PVF

First Annual

PVF RED ANGUS

BULL & FEMALE SALE

MARCH 26, 2026

SOMERS, CONNECTICUT

Welcome!

Dear Cattlemen, Friends, and Fellow Breeders,

Welcome, and thank you for your interest in the First Annual PVF Red Angus Bull & Female Sale. Hosting this sale represents a major milestone for our family and our program, and one that has been years in the making. What you see offered here is the result of intentional decisions, disciplined selection, and a clear vision for the kind of Red Angus cattle we believe matter in real-world production.

PVF Red Angus was built from the ground up with one goal in mind: to develop functional, sound, and productive cattle anchored by elite cow families. While Pleasant View Farms traces its roots as a family farming operation back to 1918, the PVF Red Angus program represents a more recent chapter of that history—built with the same standards, discipline, and long-term commitment through years of evaluation, travel, and learning from some of the most respected herds in the country. We believe lasting progress starts with the female, and our program is built around proven maternal lines known for fertility, udder quality, structure, and longevity. Bulls are selected not just to sell, but to work—and the same standards apply to the females we keep and the ones we offer.

This inaugural offering is intentionally selective. Every bull and female in this sale represents the type of cattle we use within our own operation. These cattle have been developed with longevity and durability in mind, and selected to balance phenotype with performance—not one at the expense of the other. Our focus has always been on cattle that hold up over time and generate value well beyond sale day.

We are excited to present a set of bulls we believe can add immediate value as herd sires, along with elite females and genetic opportunities that reflect the direction of our program. This offering is not a snapshot—it is a foundation for where PVF Red Angus is headed.

We sincerely appreciate the many mentors, partners, customers, and friends who have supported us along the way. Whether you are familiar with our program or evaluating PVF cattle for the first time, we welcome your questions and your interest. We invite you to study the offering, reach out to us directly, and join us on sale day. Thank you for your consideration and support. We look forward to visiting with many of you and sharing this exciting next step for PVF Red Angus.

Sincerely,

Jacob Lipton

Jacob Lipton & Family

Additional lodging available within 20 minutes of the farm.

DELIVERY & POST-SALE CARE

Free care and feeding on any bull or heifer purchased until June 1st, 2026

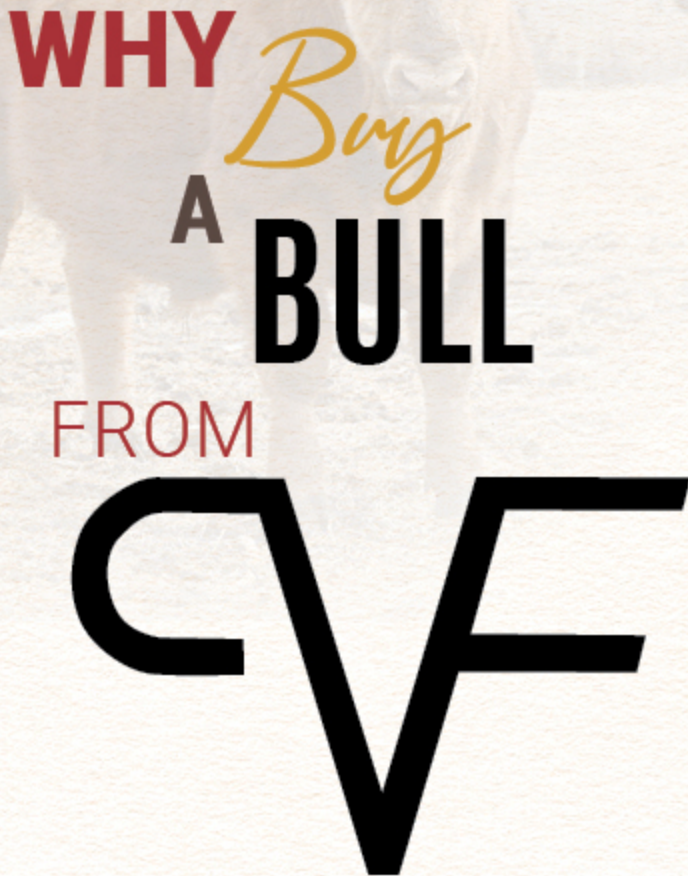

Free delivery to surrounding states (see page 8)

Fixed-rate delivery to central U.S. locations (see page 9)

Sale-Day Incentive (Does NOT apply to Commercial Lots):

\$100 off each bull or heifer taken home sale day through Friday, April 3, 2026

WHY A *Bug* BULL FROM PVF

At PVF Red Angus, our focus is simple: to raise well-balanced cattle that combine sound structure, fertility, and efficiency with the mass and performance needed to remain productive and add value year after year.

We believe the most valuable cattle are the ones that stay sound, breed back, and perform over time.

POWER, MASS & REAL-WORLD GROWTH

One of the most common comments we hear from visitors touring the herd is the bone density, foot quality, mass, and natural shape of our cattle.

They are built with substance — cattle that carry:

- real bone and foot quality
- depth of body and capacity
- muscle and natural mass
- balanced phenotype with the kind of look and design that turns heads and holds up

We believe growth matters. Pounds matter. But growth alone is not the goal.

Long-term profitability depends on well-balanced cattle that combine structure, fertility, and efficiency with the ability to convert forage and feed into performance without falling apart.

Calving ease is important — but not at the expense of maternal strength, durability, or end-product value.

Our goal is to raise cattle that calve unassisted, maintain fertility and longevity within the cow herd, and consistently wean efficient calves that feed and finish with value.

BALANCED, INTENTIONAL SELECTION

We do not chase extremes.

Every mating at PVF is designed to balance:

- calving ease with performance
- structure with growth
- phenotype with data

We believe true progress comes from cattle that bend the growth curve while strengthening maternal traits — not from single-trait selection that creates new problems down the road.

The result is cattle that work across a wide range of environments, maintain condition efficiently, stay sound, and remain productive year after year.

A COW HERD BUILT TO LAST

Great bulls are a reflection of the cow herd behind them.

Our foundation cows are selected for:

- fertility and udder quality
- structural correctness and longevity
- efficient, functional frames with real capacity

Every bull and female selling is backed by a cow we believe in — developed through AI and embryo transfer matings using elite PVF donor cows alongside females sourced from some of the most respected herds in the United States.

These cows have proven their ability to raise calves with performance, consistency, and durability, forming the foundation of the PVF program.

DATA THAT SUPPORTS WHAT YOU SEE

We believe data should confirm what your eye already tells you — not contradict it.

Every registered animal selling is:

- parent verified
- genomically enhanced (GGP), where applicable
- ultrasound carcass scanned, with data submitted to the Red Angus Association of America

Ultrasound data is used to enhance carcass EPDs for:

- Ribeye Area (REA)
- Backfat Thickness (BF)
- Intramuscular Fat Percentage (IMF)

This information provides additional accuracy and confidence for buyers focused on long-term value, carcass merit, and end-product performance.

PROVEN ACROSS ENVIRONMENTS

PVF genetics are working in operations across the country — from cold northern winters to hot, challenging southern environments.

These cattle are developed to work in real-world conditions, not pampered settings. That adaptability matters when cattle leave our operation and are expected to go to work immediately in yours.

PVF

BUYER

Advantage

**Standing behind the cattle —
before and after sale day.**

BREEDING GUARANTEE & HERD HEALTH

- All animals sell with a breeding guarantee.
- All bulls have passed a Breeding Soundness Exam (BSE) prior to sale
- All bulls are BVD-PI negative
- All animals are guaranteed for soundness and fertility for the first breeding season
- Guarantee terms follow guidelines set forth by the Red Angus Association of America

Complete guarantee terms are available online or upon request.

GENOMIC & PEDIGREE VERIFICATION (GGP) GGP

Any animal displaying the GGP logo on their pedigree is:

- Parent Verified
- Genomically Enhanced, increasing EPD accuracy and reliability
- Some animals will have updated EPD data available at sale time.

ULTRASOUND CARCASS DATA

All registered animals selling have been ultrasound carcass scanned.

- Data collected through ultrasound and submitted to RAAA
- Used to enhance carcass EPDs including:
 - Ribeye Area (REA)
 - Backfat Thickness (BF)
 - Intramuscular Fat Percentage (IMF)

This data adds another layer of transparency and value for buyers focused on performance beyond weaning.

INSURANCE & RISK MANAGEMENT

We encourage buyers to protect their investment.

- PVF will pay the first 2% of Option 1 All-Risk Mortality insurance on all registered cattle
- Buyers are encouraged to insure animals if they remain at PVF after sale day
- Insurance is strongly encouraged, but not required

FREE CARE UNTIL JUNE 1

As an added convenience, PVF will care for purchased cattle at no charge.

- Free feed and care until June 1 following the sale
- No daily yardage, feed, or handling charges
- Liability transfers to the buyer at the conclusion of the sale

DELIVERY OPTIONS

We work to make delivery straightforward and predictable.

- Free delivery to surrounding states
- Flat-rate trucking available to centralized U.S. delivery points (see page 9)
- Assistance with trucking coordination available upon request

EARLY VIEWING INCENTIVE

We strongly encourage buyers to view cattle prior to sale day.

- Buyers who tour the cattle before sale day will be entered to win a \$1,000 Sale Day Credit
- Credit is eligible toward the purchase of any registered animal
- Winner announced on sale day

PVF CALF BUY-BACK PROGRAM

We believe our responsibility doesn't end at the sale.

- Calves sired by eligible PVF bulls may qualify for the PVF Calf Buy-Back Program (see page 55)
- Program requirements and details are outlined later in this catalog

FIRST ANNUAL BULL & FEMALE SALE

The PVF Red Angus Team

ROOTED IN FAMILY. SHAPED BY GENERATIONS. FOCUSED ON THE FUTURE.

FAMILY & PROGRAM STEWARDSHIP

Jacob & Katie Lipton

Jacob Lipton serves as Herd Manager for PVF Red Angus and leads genetic direction, mating decisions, and herd development. With an emphasis on performance-driven breeding and vertically integrated beef production, he plays a leadership role across the broader Pleasant View Farms operation, working alongside family in both livestock and crop enterprises while remaining hands-on with cattle management year-round.

His wife, Katie Lipton, brings a strong professional background in veterinary medicine and supports the cattle program through herd health, calving, and animal care, while also managing sales coordination and customer relations for Pleasant View Farms. Together, Jacob and Katie are grateful to be raising their son, Simon, on the farm while building a cow-centered Red Angus program rooted in functionality, structure, and long-term productivity.

Louis & Deborah Lipton

Louis Lipton serves as the crop manager for Pleasant View Farms and oversees agronomy, crop planning, and day-to-day management of the row-crop enterprise. His responsibilities include guiding crop rotations, fertility programs, and grain handling, along with management of the farm's grain elevator and dryer system supporting both the cropping operation and the broader Pleasant View Farms feed business. His wife, Deborah Lipton, supports the operation through administrative and office responsibilities, helping with inventory tracking, bill payment, and keeping communication flowing as the family balances daily responsibilities in the field and with livestock. Together, Louis and Deborah are raising their three daughters—Ellian, Evelyn, and Eliza—while contributing to the long-term strength and continuity of Pleasant View Farms.

Jeffrey & Joanne Lipton

Jeffrey Lipton represents the generation that preserved and carried Pleasant View Farms through significant change, helping ensure its continuity for the next generation. Having guided the farm through its origins as a large dairy operation and later periods of diversification, Jeffrey's focus was always on keeping the farm intact and positioned for future opportunity. Today, he remains actively involved, offering guidance on planning and financial decisions while still enjoying time in the field during hay and straw season. His wife, Joanne Lipton, has been by his side since the 1980s, supporting both on- and off-farm business ventures while raising their family. Together, Jeffrey and Joanne take pride in seeing Pleasant View Farms evolve into a diversified operation and in supporting the next chapter of progress led by their family.

CATTLE OPERATIONS

Samantha "Sammy" Hoffman

Sammy serves as the herdsman for PVF Red Angus and oversees the daily care and management of the cow herd. Her responsibilities include calving supervision, breeding, cattle handling, feeding, and herd health, along with maintaining consistent routines that support soundness and performance. She has also been a valuable help in preparing, clipping, and photographing cattle for sale. Family is important to Sammy, and she enjoys spending time with her family and her son, Jimmy. Sammy brings attention to detail, pride in her work, and a strong sense of responsibility, playing a key role in the consistency and success of the PVF Red Angus program.

EXTENDED FARM SUPPORT

PVF Red Angus is supported by the broader Pleasant View Farms team, and we are grateful for the many individuals whose work helps keep the operation running smoothly year-round. From driving trucks and fieldwork to shop support, nutrition, office operations, and customer service, each person plays an important role in the success of the farm. We value the dedication and teamwork that go into every part of the operation and are thankful to work alongside a group we consider an extended family. We would also like to thank our partners at Kalmbach Feeds for their guidance and support in herd nutrition, which continues to contribute to the performance and development of our cattle.

Delivery, PICKUP & CARE INFORMATION

PICKUP INCENTIVE

Any registered bull or female picked up sale day through Friday, April 3, 2026 will receive:
\$100 per head off the purchase price
Loading will begin immediately following the sale and by appointment in the days after.

FREE DELIVERY REGION

Free delivery will be provided to central delivery points within the surrounding region:
CT • MA • RI • NY • NH • VT • ME • NJ • DE • PA • MD

NATIONWIDE DELIVERY

Delivery outside the surrounding region will be charged according to the distance zones shown on the delivery map and organized to a central meeting location.

Central points for delivery commonly include auction barns, vet clinics, or other suitable locations determined by the truck driver at the time of delivery. We ask customers to please be accommodating so cattle can be delivered efficiently and with minimal stress.

We will work with buyers to get cattle as close to your operation as reasonably possible in a timely manner.

DELIVERY COORDINATION

Cooperation in meeting at designated delivery locations helps minimize time on the truck and keeps cattle in the best condition possible. We appreciate your flexibility as routes are finalized.

COMMERCIAL LOTS

This pricing policy does NOT apply to commercial lots. Delivery of all commercial cattle will be charged to the buyer at full trucking cost. Commercial females are requested to be picked up by April 15, 2026. We are glad to assist with arranging trucking.

CARE & FEEDING

Free care and feeding will be provided on all registered bulls and heifers until June 1, 2026. Buyers are encouraged to insure their purchases, particularly if cattle remain at PVF after the sale.

WHAT IS A GOOD BULL *worth* IN 2026?

As referenced in a recent Drovers article, a good bull is worth the value of 5 calves he sires.

But that depends on how you market those calves.

USING END-OF-YEAR 2025 MARKET PRICES REPORTED BY OKLAHOMA STATE UNIVERSITY LIVESTOCK ECONOMIST, DERRELL PEEL.

IF CALVES ARE SOLD AT WEANING

500 LB X \$4.80/LB - \$2,400 PER HEAD

5 CALVES=\$12,000

IF CALVES ARE SOLD AS YEARLINGS

800 LB X \$3.50/LB - \$2,800 PER HEAD

5 CALVES=\$14,000

IF OWNERSHIP IS RETAINED THROUGH FINISHING

1,500 LB X \$2.29/LB - \$3,435 PER HEAD

5 CALVES=\$17,125

THE LONGER YOU RETAIN OWNERSHIP, THE MORE IMPACT GENETICS HAVE ON YOUR BOTTOM LINE.

THE FIVE-CALF RULE MEASURES SALE VALUE, IT DOES NOT ACCOUNT FOR:

- REPLACEMENT DAUGHTERS
- FERTILITY
- STRUCTURAL LONGEVITY
- FEED EFFICIENCY
- CARCASS MERIT

IN *today's market*
A HERD BULL IS NOT JUST AN EXPENSE LINE.
HE'S A LONG TERM
profit driver.

DON'T BUY THE BEST YOU CAN AFFORD.
FIND THE RIGHT GENETICS YOU NEED

and figure out HOW TO AFFORD THEM.

-STEVE MAIER, C-BAR RANCH

If you're going to lead off the first annual PVF Red Angus Bull & Female Sale, you better earn it – and Cornerstone has done exactly that.

Posting an impressive 869 lb AWW, he brings a rare combination of mass, shape, and balance. He's bold-ribbed, deep-sided, and strong over his top, yet remains dean-fronted and athletic. He combines genuine power with the structural correctness that makes him a true herd bull prospect.

He's just as impressive genomically as he is physically, ranking in the top 9% for ProS with 9 traits in the top 20% of the breed. He also scanned an impressive 113 IMF ratio and 112 REA ratio, matching his carcass quality to his elite presence.

Sired by the deceased \$180,000 KJL/CLZB Complete 7000E and backed by the rising donor C-Bar Abigrace 122J, a Hard Drive daughter out of legendary Abigrace 636D – maternal granddam of the \$400,000 PIE Hollywood. 122J's influence runs deep in this offering, with several of her progeny highlighted throughout the sale.

This is the kind you build around.

Check out this thick, smooth, and powerful PIE Hollywood 222 son backed by the legendary C-Bar Stony 837F – a cow whose influence continues to shape our program at PVF.

905N scanned an impressive 118 IMF and 102 REA ratio, ranking in the top 1% for YW, 2% for WW, and 4% for GridMaster – elite growth and carcass strength anchored by maternal power.

905N is a maternal brother to the \$42,000 C-Bar Crackerjack, owned by Ressler Land & Cattle, and to Berwald Stony 2091 – dam of the record-setting \$170,000 ND Red Select heifer. The Stony cow family has left its mark in some of the most respected herds in the country. Several maternal siblings to 905N are represented throughout this sale.

Through Hollywood, he brings together the proven Stony and Abigrace cow families – two of the most influential maternal lines in the breed.

BIEBER TILLY 399W
MATERNAL GRANDDAM

A favorite from early on, 329N has continued to impress. He commands attention the moment you step into the pen – powerful, balanced, and built with presence, reminding us a great deal of his sire, Outright 221L.

He has performed near the top of his group for WDA and ADG and scanned an impressive 114 REA ratio. Offering added frame, length of body, and spring of rib, he ties it together with a smooth shoulder, level hip, and excellent foot structure.

His dam, TKP Tilly 928, was the high-selling female of Pieper's 2023 Fall Sale, purchased in partnership with Kirwan Red Angus. Her progeny continue to rise to the top in both programs, including KRA/PVF Tilly 4022, widely regarded as one of the most impressive Hollywood daughters to date. Behind her stands the legendary Bieber Tilly 399W, dam of breed standouts such as Rollin' Deep.

Whether you're advancing a seedstock program or strengthening a commercial cow herd, 329N offers the kind of genetics that move programs forward.

361N is a maternal brother to our lead-off bull, 1031N, further highlighting the strength and consistency of the 122J Abigrace influence. The depth of that cow family is evident throughout this offering, and 361N stands as another example of its power.

He is well rounded both genomically and physically, combining balance and structural integrity with serious carcass merit. Ranking in the top 5% for GridMaster, he brings real-world profitability into a complete package.

361N is among the first sons to sell by the late \$85,000 Outright 221L, and he carries the same presence and correctness that made his sire so sought after. Backed by C-Bar Abigrace 122J – a Hard Drive daughter out of legendary Abigrace 636D, maternal granddam of the \$400,000 PIE Hollywood – he represents another powerful extension of the 122J and Abigrace influence.

For those who value maternal strength backed by carcass and balance, 361N deserves serious consideration.

350N has been a head turner from early on – dark cherry red, balanced, and built with presence. Carrying an outcross pedigree to much of this offering, he is sired by the \$75,000 PIE Intensity, owned by Hansine Ranch. The Intensity progeny to date have been impressive for balance, performance, and overall quality, and 350N fits that mold.

Genomically, he stands strong with 10 traits ranking in the top 20% of the breed. Phenotypically, he is smooth-made, athletic, and strides with confidence on a correct foot and sound structure.

His maternal lineage traces to Berwald Bonne Bel 1165J and back to the legendary TKP Bonne Bel 110, dam of Cinch – a cow family known for maternal consistency and longevity.

An outcross option with balance and structural integrity, 350N is positioned to make an impact.

1519N carries a unique and exciting pedigree. A standout Stockmarket son, he is backed by a productive dam boasting a 104 MPPA and tracing to the influential BLAIRS Blackbird 107X cow.

On development, 1519N has continued to sort himself toward the top, ranking in the top 8% for ProS, 6% for Yearling Weight, and 8% for GridMaster. He scanned an impressive 118 IMF ratio and 103 REA ratio, tying carcass quality to real-world performance. With little to no semen available on Stockmarket, sons of this caliber are poised to carry his influence forward.

His dam, a beautiful daughter of HXC Grindstone, is feminine, clean-fronted, and long-bodied – the kind that adds maternal strength and longevity to a program.

The maternal power behind 1519N runs deep, and it shows in both his data and his build.

MATERNAL SIB

Headland 363N is built for those who appreciate genuine power and presence. Ranking near the top of his contemporaries for growth, he posted an impressive 772 lb adjusted weaning weight and 1,347 lb adjusted yearling weight.

Deep ribbed, long bodied, big hiped, and heavy boned, 363N carries tremendous mass and dimension. He is one of the most physically powerful sons of the late \$85,000 Berwald PVF Outright 221L to sell, offering a raw, stout build with the kind of structural integrity that holds up in real-world conditions.

His dam, C-Bar Stony 6H, is a beautiful Domain daughter we admired firsthand during our visit to C-Bar Ranch in Kansas with Steve Maier. That maternal strength traces back to the breed legend Stony A302. He is also a maternal brother to the \$90,000 Kirwan Stony 5007, further reinforcing the eaming power behind this cow family.

For programs seeking a added frame, substance, and maternal backing, 363N delivers a practical kind of performance.

BIEBER JUMPSTART J137
SIRE

537N is a standout Jumpstart son out of Christy's Doarv 33L, a cow boasting an impressive 107 MPPA. His maternal lineage is known for sound foot and leg structure paired with powerful maternal traits.

Performance wise, 537N ranks in the top 2% for WW and top 3% for YW, while posting an impressive 118 REA ratio. He combines that growth with phenotype – long-bodied, level-topped, and loaded with muscle and expression.

A balanced, high-growth option backed by maternal strength, 537N offers real-world performance in a structurally correct package.

328N is a bull that has truly excited us from the start. Big hiped, level topped, and packed with dimension and muscle expression, he has rung the bell at every stage. Sired by the late \$85,000 Berwald PVF Outright 221L and out of one of our favorite young cows, Lipton Abigrace 226L, he showcases the kind of power and consistency this pedigree is capable of.

He posted an impressive 785 lb adjusted weaning weight and 1,448 lb adjusted yearling weight — ranking among the very top of the 2025 PVF calf crop. He backed it up at ultrasound, scanning an outstanding 118 IMF ratio and 112 REA ratio. Few bulls in the offering combine this level of growth and carcass quality.

On the maternal side, 226L traces back to the influential L7730 donor, stacking Abigrace maternal strength on both sides of the pedigree. Built to pass on pounds and carcass merit, 328N is the kind that won't go unnoticed.

364N is a maternal brother to our lead-off bull, Cornerstone, and a full brother to Eastbound – reinforcing the strength and consistency of the 122J Abigrace influence.

He is well rounded both genomically and physically, ranking in the top 7% for GridMaster with over nine traits in the top 20% of the breed. He backed it up at ultrasound, posting an impressive 125 IMF ratio.

A son of the late \$85,000 Berwald PVF Outright 221L, 364N carries the presence and structural correctness that made his sire so sought after.

Full sib to Lot 4 (Eastbound)

Proven maternal backing paired with elite carcass strength – 364N deserves serious consideration.

180N is another standout son of the late \$85,000 Berwald PVF Outright 221L and out of the breed legend C-Bar Stony A302. As a two-year-old with calf at side, A302 produced an iconic image that has come to symbolize the ideal Red Angus female. Her influence can be found in some of the most respected herds a cross the country.

180N is simply a good one – sound structured, correct on his feet and legs, and built with balance and presence.

Stacking the proven Stony cow family with the Abigrace influence, 180N brings together two powerful maternal lines in one complete package.

348N is a powerful son of the deceased Hard Drive and represents an increasingly rare opportunity. With little to no semen available, sons like this are difficult to replicate.

He is out of one of our favorite young donors, Lipton Bonne Bel 219L, a beautiful PIE Commander daughter tracing back to the influential TKP Bonne Bel 110. 219L has quickly worked her way toward the top of our program.

348N posted an impressive 114 REA ratio, further reinforcing the carcass strength behind this mating. Maternal siblings by Confidence Plus sell as a featured choice lot in our female offering.

This is a well-balanced herd bull prospect with proven maternal backing.

5161N is an impressive son of U2Q Boss Hog, a sire combining two of the most influential females in the Red Angus breed – 113Z and Copenhagen's dam. This is the kind of Red Angus bull you can build a herd around.

His dam is a beautiful Stockmarket daughter from the Nikita cow family tracing back to Brylor Ranch, boasting a 102 MPPA with excellent udder quality and superior docility.

Performance wise, 5161N has been second to none, scanning an impressive 121 IMF and 107 REA ratio.

If you're looking to advance both maternal strength and performance, 5161N deserves serious consideration.

A favorite from early on, 324N continues to impress. A full brother to Defiant, he carries the same presence and balance that made that mating so exciting. Powerful, long-bodied, and smooth through his shoulder, he ties it together with a level hip and excellent foot structure.

His dam, TKP Tilly 928, was the high-selling female of Pieper's 2023 Fall Sale, purchased in partnership with Kirwan Red Angus. Her influence continues to rise in both programs, tracing back to the legendary Bieber Tilly 399W.

If you value pedigree depth and structural correctness, 324N represents another strong extension of this proven cow family.

349N is a maternal brother to the \$85,000 Outright 221L and out of the rising young donor Berwald Abigrace 1110J. This bull blends proven maternal strength on both sides of his pedigree.

Sired by Deep Creek Legitimate 203, a son of Myers Fair-N-Square M39, 349N stacks impressive cow power, tracing the Abigrace influence back to the legendary 7730 donor. The depth of this maternal foundation is hard to overlook.

He offers balance across the board, ranking with many traits in the top third of the breed and posting a solid 109 IMF ratio.

349N represents a strong combination of pedigree depth and practical performance.

925N is sired by the renowned PIE Quarterback 789, and this mating has proven very successful for us at PVF.

His maternal strength is equally impressive. His dam is a maternal sibling to the widely used Genex AI sire C-Bar Collateral 203J, further validating the consistency behind this cow family. That consistency is evident in 907G's ability to produce elite bulls, including our high-selling LIPTON PVF Quarterback 275M in the 2025 NY Right on Red Sale, now working for Explosive Cattle Company in Arkansas.

925N represents another strong extension of this proven, performance-driven stony cow family.

Berwald Abigrace 1110J, a high-selling female in the 2022 ND Red Select sale, has quickly become a cornerstone donor in our program. A daughter of PIE Quarterback 789 and granddaughter of legendary C-Bar Abigrace 684D, she combines structural integrity with elite maternal strength.

Her first calf, the \$85,000 Berwald PVF Outright 221L, has since become a widely recognized sire, stamping progeny with power and consistency across programs nationwide. Her influence extends to several lots throughout this offering, further validating the strength and consistency she brings to our program.

Mated to Berwald Destiny 3138, this pairing unites the influential Abigrace and Taffeta cow families in one forward-looking genetic package.

Embryos sell with a guarantee of one pregnancy if transferred by a certified technician.

Lipton PVF Bonnebell 219L is a young donor backed by one of the most respected maternal lines in the breed. A powerful daughter of PIE Commander, she traces to TKP Bonnebell 110 – dam of the renowned PIE Cinch – a cow family known for udder quality, fertility, and long-term production. A featured selling choice of 219L's Confidence Plus daughters appears later in this catalog.

Mated to the now deceased AI sire LSF Identity 0295H, this pairing blends structural integrity and maternal consistency. Expect balanced, durable cattle with the kind of longevity and practicality that move a program forward.

Embryos sell with a guarantee of one pregnancy if transferred by a certified technician.

Jeffries Ms. Lady G26 was our pick and the high-selling female from the renowned Jeffries Red Angus dispersal in Oklahoma. A beautiful Franchise daughter, she combines presence, structure, and maternal strength in a front-pasture kind of package. Her Quarterback son, Omaha, sold for \$28,000 to Campbell Red Angus in South Dakota, and her daughters consistently rise to the top of our replacement pen.

Mated here to the exclusive black-red carrier bull HRP Clarity 3054L, this pairing introduces fresh genetics backed by the proven performance and phenotype of Connealy Clarity. Expect balance, structural integrity, and the kind of eye appeal that holds long-term value.

ONCE IN A LIFETIME OPPORTUNITY!

LIPTON PVF BEAUTY 357N is simply one of a kind. A head-turner from an early age, she is the type and kind of female you can build a herd around. Praised by visitors as one of the nicest daughters of the legendary U-2 Beauty 113Z seen to date, she combines power, femininity, and structural correctness with a striking dark cherry color in a flawless package.

Her maternal brother is the \$130,000 U-2 Township 17G, with numerous other sale-topping maternal siblings. A daughter of the \$400,000 PIE Hollywood 222, 357N posted nearly an 1,100-lb yearling weight and a 111 REA ratio, continuing to impress breeders who see her in person. An opportunity to partner with us on a truly special young donor as we build around her for the future. Adding further value, this offering includes five IVF embryos sired by NIO Improver 4099, the \$155,000 record-selling Red Angus bull of 2025.

SELLING 1/2 EMBRYO INTEREST ONLY.

LIPTON PVF BONNE BEL 327N is a standout Confidence Plus daughter with the power, balance, and presence that defined this flush from the start. She is deep-bodied, bold through her rib, and square-made from the ground up, combining substance with femininity and structural correctness in a very functional package. Her maternal backing traces through a powerful PIE Commander daughter to the legendary C-Bar Abigrace 636D, a cow family long recognized for fertility and longevity. She and her flushmates ranked as the three heaviest weaning heifers of the 2025 PVF calf crop, reflecting the real-world performance behind this mating. A flushmate to 320N, a special female we had intended to build our herd around before her untimely loss, 327N posted a 1,056 lb adjusted yearling weight and a 111 REA ratio, offering the potential to produce influential females and herd sires for years to come.

At the buyers convenience, we are retaining the option to a flush with a minimum of (6) viable embryos to the bull of our choice.

LIPTON PVF ABIGRACE 372N is a maternal sibling to the late \$85,000 Berwald PVF Outright 221L and the first female to sell from our herd matriarch, Berwald Abigrace 1110J. This female represents a cornerstone of our program and the depth behind one of the most influential cow families in the breed. She is sired by the \$75,000 PIE Intensity owned by Hansine Ranch, and the Intensity progeny to date have been extremely impressive for balance, performance, and quality. A head-turner since day one, 372N has been a hard one to let go, but we are proud to share the power of what 1110J can raise and look forward to the impact she will make in another program. On paper, she ranks top 13% ProS with eight traits in the top 20%, while posting a 117 IMF ratio and a 105 REA ratio.

At the buyers convenience, we are retaining the option to a flush with a minimum of (6) viable embryos to the bull of our choice.

LIPTON PVF 507C-316N is a young donor female prospect backed by a maternal line we have been very intentional about investing in. She is a maternal sibling to the legendary \$180,000 KJL/CLZB Complete 7000E and out of one of our favorite cows in the breed, HXC 507C. Her full brother, Aftershock 325N, sells as a lead-off bull, further reinforcing the consistency behind this cow family. After seeing the kind of cattle Complete 7000E produced, we went directly to the maternal source and acquired embryos from HXC 507C following her proven impact at Hansine Ranch. Ranking in the Top 1% for Yearling Weight EPD and posting a 120 IMF ratio, 316N combines performance with the kind of maternal backing that gives us confidence in her future.

At the buyers convenience, we are retaining the option to a flush with a minimum of (6) viable embryos to the bull of our choice.

LIPTON PVF STONY 321N is a beautifully made, broody young donor prospect with real power, capacity, and the look of a true foundation brood cow. Her dam, the legendary C-Bar Stony 837F, has been extremely influential in our herd at PVF, and we plan to continue building around this cow family with additional maternal siblings in production. 321N is a maternal sibling to the \$42,000 C-Bar Crackerjack, owned by Ressler Land & Cattle, and to Berwald Stony 2091, the dam of the record setting \$170,000 ND Red Select heifer. One of the first progeny to sell by the late \$85,000 Berwald PVF Outright 221L, 321N combines the proven Stony cow family—anchored by C-Bar Stony 837F and A302—with added cow power on the paternal side through Abigrace 1110J and the prolific 684D donor. She ranks top 23% ProS, top 3% GridMaster, top 1% REA, and posted an impressive 1,122lb adjusted yearling weight. We look forward to the impact she will make in another program.

At the buyers convenience, we are retaining the option to a flush with a minimum of (6) viable embryos to the bull of our choice.

LIPTON PVF STONY 369N represents a uniquely rare genetic combination, sired by the late \$180,000 KJL/CLZB Complete 7000E out of the legendary C-Bar MS Stony A302. There is no other Complete * A302 female in existence outside of the PVF program, making this a truly one-of-a-kind opportunity. This mating unites two of the most influential cow lines in the Red Angus breed, blending the power and consistency of HXC 507C on the paternal side with the proven Stony A302 cow family maternally. Phenotypically, 369N is beautifully made—moderate, feminine, bold in her rib, and correct on a strong foot and leg. She also scanned a 109 REA ratio, adding performance to her already elite profile. With Complete now deceased and semen unavailable, this opportunity will not come around again.

At the buyers convenience, we are retaining the option to a flush with a minimum of (6) viable embryos to the bull of our choice.

LIPTON PVF FAYETTE 317N is a beautifully made daughter of the \$400,000 PIE Hollywood 222, offering the balance, femininity, and carcass merit expected of a true donor prospect. She stands out with a great spring of rib, natural body shape, and an excellent foot and leg structure that supports longevity and function. On paper, she matches her phenotype, ranking top 16% ProS with eight traits in the top 15% of the breed and posting an outstanding 131 IMF ratio. Her dam, PIE Fayette 1215, is one of our most trusted cows, known for exceptional fertility with a perfect AI conception record and a tight calving interval. With multiple daughters in production across the United States and multiple progeny turning heads and commanding strong value, 317N offers proven maternal depth with elite genetic upside.

At the buyers convenience, we are retaining the option to a flush with a minimum of (6) viable embryos to the bull of our choice.

LIPTON PVF ABIGRACE 362N represents the next generation from the rapidly emerging C-Bar Abigrace 121J, offering excellent phenotypic balance and genomic strength. Her maternal lineage traces to the infamous C-Bar Abigrace 636D, maternal granddam of the \$400,000 PIE Hollywood, and back to the legendary Y11 cow—one of the breed's most influential cow families. On the paternal side, 362N is among the first progeny to sell by the late \$85,000 Berwald PVF Outright 221L, out of Abigrace 1110J and tracing to the prolific L7750 cow. Stacked with maternal power on both sides, 362N ranks top 20% or better for 10 traits, including five in the top 5%—ProS, GridMaster, Marb, YG, and REA—while posting a 104 IMF ratio and a 112 REA ratio.

At the buyers convenience, we are retaining the option to a flush with a minimum of (6) viable embryos to the bull of our choice.

LIPTON PVF STONY 360N is a beautifully made daughter of the \$400,000 PIE Hollywood 222 and the influential C-Bar Stony 907G. She offers a balanced, feminine look with depth of body and natural shape—hallmarks of the Stony cow family. Her maternal strength is well proven, as she is a maternal sibling to the widely used Genex AI sire C-Bar Collateral 203J. The consistency of this cow family is further evidenced by 907G's ability to produce elite bulls, including our high-selling LIPTON PVF Quarterback 275M in the 2025 NY Right on Red Sale, going to Explosive Cattle Company of Arkansas. 360N represents another opportunity to access the maternal power and proven look the Stony lineage is known for.

LIPTON PVF MS LADY 378N is a standout daughter of the late \$85,000 Berwald PVF Outright 221L and the first female to be offered from Jeffries MS Lady G26, one of our favorite cows in the program and the high-selling pick we selected from the Jeffries Red Angus herd. She is bold through her rib, deep-bodied, and sound on a strong foot and leg, offering the kind of look and structure that translates into long-term productivity. A maternal sibling to the \$28,000 Berwald PVF Omaha 213K, now at Campbell Red Angus in South Dakota, this female blends maternal power from the Lady Bird cow family with proven influence tracing to A-1 Haymaker 511V and back to the C-Bar Abigrace Y11 cow on the paternal side. 378N also boasts a top 4% ProS with 11 traits in the top 20% of the breed.

At the buyers convenience, we are retaining the option to a flush with a minimum of (6) viable embryos to the bull of our choice.

Lot 46 5 AI BRED RED ANGUS HEIFERS

AI bred to the \$85,000 Berwald Outright 221L
Due September 9, 2026
These heifers were selected from our commercial replacement group and AI bred to the late Outright 221L. All are confirmed safe to the AI date, providing a tight and predictable calving window.

BERWALD PVF OUTRIGHT 221L
SERVICE SIRE OF LOT 47

CALF SEX RESULTS:

2247 – BULL, 2248 – BULL, 2249 – HEIFER, 2245 – HEIFER, 2250
– SEX UNDETERMINED

Lot 47 5 RED ANGUS BRED HEIFERS

Bred to the \$21,000 HRP Complete 4124M
Due September 25 – October 5, 2026
These heifers were selected from our herd and bred to HRP Complete 4124M – our pick from the 2025 Harsine Ranch Bull & Female Sale. The group offers a short fall calving window spanning just ten days.

2243, 2421, 2242, 2224, 2419

HRP COMPLETE 4124M
SERVICE SIRE OF LOTS 47 & 48

Lot 48 5 RED ANGUS BRED HEIFERS (EXPOSED)

Exposed to the \$21,000 HRP Complete 4124M
These heifers were selected from our herd and exposed to HRP Complete 4124M.
Updated pregnancy status and projected due dates will be announced prior to or on sale day.

Commercial Red Angus Bred Heifers

These commercial bred heifers have been hand selected from our herd and from customers running similar PVF-based genetics. All are out of registered cows, sires, and developed under a consistent management program focused on soundness and longevity.

All bred heifers:

- EID tagged
- Pre-breeding vaccinated
- Ultrasound pregnancy confirmed
- Igenity tested with sire parentage verified

Igenity testing provides a genetic profile ranking the heifers across multiple economically important traits, giving commercial buyers an added layer of selection confidence beyond phenotype alone.

Commercial females are requested to be picked up by April 15, 2026. We are glad to assist with arranging trucking.

Lot 49

5 RED ANGUS REPLACEMENT HEIFERS

A balanced, well-grown group offering consistency and maternal value. Developed to breed easily and stay productive.

302N, 297N, 292N, 300N, 293N

Lot 50

5 RED ANGUS REPLACEMENT HEIFERS

Another uniform set selected from the same replacement pen – sound, practical females ready to build a cow herd around.

286N, 287N, 314N, 305N, 289N

Commercial Red Angus Open Replacement Heifers

These home-raised spring-born yearling heifers come straight from the top end of our commercial replacement pen. All have been developed under the same consistent selection and real-world management as our registered herd. They have been grown steadily on a development ration – not pushed – with fertility and longevity in mind, and currently average approximately 1,100 lbs, putting them in ideal condition heading into breeding season.

All open heifers:

- Bangs vaccinated
- EID tagged
- Pre-breeding vaccinated
- Veterinarian palpated for reproductive soundness prior to sale
- Igenity genomic tested

Igenity testing provides a genetic profile ranking the heifers across multiple economically important traits, giving commercial buyers an added layer of selection confidence beyond phenotype alone.

As an added bonus, buyers will receive one unit of semen per heifer purchased, selectable from either Berwald Fortitude 4334M or HRP Complete 4124M.

Commercial females are requested to be picked up by April 15, 2026. We are glad to assist with arranging trucking.

PVF

Calf Buyback Program

When you breed with PVF Red Angus genetics, you're not just buying a bull – you're securing a premium outlet for your calves. Our Buyback Program offers top-of-market pricing with no commissions, shrink or price-docking, same-day pay, and direct processing options. You'll know your price before you haul – giving you peace of mind and maximizing your return. Breed with proven PVF bulls, raise healthy, documented calves and let us handle the marketing hassle.

KEEP IT SIMPLE. KEEP IT PROFITABLE.

Terms & Conditions

SALE TERMS & CONDITIONS

Please read carefully. These terms are intended to provide clarity and transparency for all buyers.

BIDDING

The auctioneer in charge will settle any disputes as to bids, and their decision shall be final.

TERMS OF SALE

Terms of sale are cash or check unless satisfactory credit arrangements have been made with sale management prior to the sale.

All animals sell to the highest bidder, with the auctioneer announcing the final selling price.

PURCHASER'S RISK & CARE

Each animal becomes the risk of the buyer at the conclusion of the sale.

While animals remain at PVF Red Angus, reasonable care will be provided in accordance with the free-care provisions outlined on page 8. Liability transfers to the buyer at the conclusion of the sale.

Buyers are encouraged to insure their purchases, particularly if animals remain at PVF following the sale.

BREEDING GUARANTEE

All animals are guaranteed for soundness and fertility for the first breeding season in accordance with the guidelines of the Red Angus Association of America.

Complete guarantee terms are available online or may be provided upon request.

HEALTH

All animals selling are eligible for interstate shipment, unless otherwise announced.

Interstate health papers will be furnished for each animal in accordance with current state and federal regulations.

ANNOUNCEMENTS

All announcements made from the auction block shall take precedence over the sale catalog and any other printed material.

CERTIFICATE OF REGISTRY

A transferred certificate of registry will be furnished to the buyer for each registered animal sold.

Buyers are responsible for providing accurate transfer information at settlement.

DELIVERY

Delivery options, free delivery areas, and flat-rate trucking programs are outlined on page 9.

PVF Red Angus will assist with delivery coordination but does not guarantee transit timing beyond reasonable logistical efforts.

SEMEN INTEREST & OWNERSHIP

PVF Red Angus is retaining a one-third (1/3) semen interest in all bulls selling.

- The buyer receives two-thirds (2/3) semen interest, full possession, full management control, and full salvage value of the bull.
- PVF's retained semen interest allows for the collection and use of semen at PVF's expense and the buyer's convenience.
- This retained interest allows PVF to preserve select genetics while buyers retain full use of their purchase.

DEFAULT

In the event of default on payment, the buyer shall be responsible for all costs incurred by the seller or sale management in collecting payment, including reasonable legal and administrative expenses.

CONTRACT

These terms and conditions constitute a contract between buyer and seller of each animal sold.

Each sale or resale of an animal constitutes a separate transaction.

LIABILITY

All persons attending the sale or visiting the farm do so at their own risk.

PVF Red Angus, sale management, and their representatives assume no liability for accidents, injury, or loss that may occur.

THANK YOU

Thank you for your interest in PVF Red Angus. We appreciate your business and the confidence you place in our program.

Red Angus Guide to EPDS and Indexes

ProS – Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include CED, ADG, HPG, STAY, MW, DMI, CW, MARB, REA and Fat.

Index | Dollars per Head | Higher Value

HB – HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning.

HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning.

This index is a combination of CED, CEM, WW, Milk, MW, HPG and STAY.

Index | Dollars per Head | Higher Value

GM – GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feed yard performance and carcass traits.

GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. This index is a combination of ADG, CW, DMI, MARB, Fat and REA.

Index | Dollars per Head | Higher Value

CED – Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams.

Percent | Higher Value

BW – Birth Weight predicts differences in actual birth weight of progeny. **Pounds | Lower Value**

WW – Weaning Weight predicts differences in 205-day weaning weight. **Pounds | Higher Value**

YW – Yearling Weight predicts differences in 365-day yearling weight. **Pounds | Higher Value**

ADG – Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. **Pounds | Higher Value**

DMI – Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period.

Pounds | Lower Value

MILK – Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. **Pounds | Higher Value**

ME – Maintenance Energy predicts the difference in maintenance energy requirements. **Mcals per Month | Lower Value**

HPG – Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. **Percent | Higher Value**

CEM – Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers.

Percent | Higher Value

STAY – Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. **Percent | Higher Value**

MARB – Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib.

Marbling Score Units | Higher Value

YG – Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. **Yield Grade Units | Lower Value**

CW – Carcass Weight predicts differences in actual hot carcass weight. **Pounds | Higher Value**

REA – Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. **Square Inches | Higher Value**

FAT – Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. **Inches | Lower Value**
