51ST ANNUAL PRODUCTION SALE

WEDNESDAY 1 PM **MARCH 18, 2026** AT THE RANCH NEAR BARTLETT, NE

- ANGUS
- SIMMENTAL & SIMANGUS™
- CHAROLAIS

Bulls and Open Heifers

WELCOME

Cattlemen & Cattlemen!

Welcome to our 51st Annual Total Performance Production sale! We appreciate your interest in our program and look forward to sharing this tremendous set of bulls and heifers with you.

Our Total Performance philosophy means that we think it's critical that cattle perform well in all areas. The ultimate goal is for our commercial cow-calf customers to be consistently profitable. For that to happen, the bulls need to sire growthy calves with eye appeal, and they need to leave behind functional, fertile, problem-free females. Everything we do has this objective in mind.

Based on customer feedback, we've started utilizing larger sire groups. (You can see progress in this area in this sale, and it will be even more pronounced in next year's.) The select few sires we use are critical to success, and I spend a lot of time researching and evaluating them; it's one of my hobbies (my wife might say obsessions.) In sire selection, great phenotype is a must because we know cattle are still bought by people, and people like to look at and buy good cattle! Numerically, if a bull is toward the bottom of the breed in any single trait that is a driver of cow-calf profitability, I won't use him. Even though that bull could sometimes be mated to just the right cow and hit a home run, when spread across the volume of cows we are breeding to, those problems are bound to pop up. Additionally, as a seedstock provider, I believe it's our job to keep you out of the ditches. When you're selecting bulls, you shouldn't have to pull up a bull's registration page and look up all 27 of his EPDs and 6 indexes to see what his flaws are. We want you to have the

confidence that we are providing bulls that exhibit Total Performance in all important areas and have no significant holes.

Culling is the next method we use to ensure our customers are getting quality. We cull early and often on both the bull and the female side. We offer an unusually low percentage of our calf crop as bulls. We're fortunate to have a very long-term time horizon so we can take some short-term financial hits-like castrating more of the male calves-because we believe it will pay off in the long run by only selling top quality. At Wagonhammer, it is an achievement for a bull to make the sale, not an expectation.

"What gets measured gets improved" is a classic quote. We strongly believe in the power of data and spend countless hours collecting and submitting data to the breed associations. Here is a list of the data we have been submitting: calving ease, birth weight, weaning weight, yearling weight, yearling height, scrotal circumference, docility, carcass ultrasound, heifer pregnancy records, entire cow herd inventory reports, teat size, udder suspension, and mature cow weight. We have large, meaningful contemporary groups and report with 100% honesty. We also genomic test every bull and replacement heifer. The beauty of genomics is it allows us to see how the genes were actually inherited, not just an estimated parental average. When the thousands of data records we submit are combined with millions of records from other herds and with genomics, we get genomic-enhanced EPDs that have incredible accuracy. Not perfect, of course, but pretty darn good.

Back to the ultimate goal of cow-calf profitability, here is a snapshot of what our Angus bulls have to offer in the traits we deem most important to ranchers. These numbers represent the median in each trait. In other words, for each trait listed, half of the bulls in our sale have higher numbers than what is listed, and half of the bulls have lower numbers. We're proud that our median bull is around the top 1/3 of the breed in every major category. There are two Angus indexes that predict cow-calf profitability: maternal weaned calf value (\$M) and weaned calf value (\$W.) See the selection tools glossary on page 2 for all the traits included in those indexes. FL-functional longevity-is a new EPD that predicts the number of calves a sire's daughter is expected to produce by 6 years of age compared to other sires. Our median bull in the sale is in the top 25% of the breed for WW, the top 35% for FL, the top 29% for \$M, and the top 20% of the breed for \$W!

| CED | BW | WW | YW | SC | MILK | FL |
|-----|-------|-------|-----|------|------|------|
| 8 | 0.9 | 78 | 134 | 1.06 | 27 | 1.10 |
| 35% | 42.5% | 25% | 28% | 39% | 45% | 35% |
| CW | MW | SEN | DOC | \$M | \$W | |
| 10 | 73 | -22 | 19 | 75.5 | 80 | |
| 30% | 47.5% | 62.5% | 55% | 29% | 20% | |

Please reach out if you'd like to talk about the cattle, and thank you for your interest in our program.

Sincerely,

Alex Wolf and the Wolf family

Terms & Conditions

Standard Terms and Conditions as adopted by the American Angus Association, American International Charolais Association and the American Simmental Association respectively.

Fertility

All bulls selling have passed a thorough breeding soundness exam by Dr. Jeremy Young. He can be contacted at jyoung@tcvetclinics.com or (402) 395-5025.

Breeding Guarantee

Bulls selling are guaranteed for 90 days from first turnout against breeding injury. If a replacement bull is available, he will be provided. If a replacement bull is not available, credit will be given in next year's Wagonhammer Sale. Credit will be the purchase price less volume discounts and salvage value of the injured bull. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be prior to October 16, 2026. This is not a mortality insurance policy. Any deviations from the above statement will be worked out between the buyer and Wagonhammer Ranch.

Retained Semen Interest

New Policy! With the exception of Patriot (Lot A), we are selling 100% semen interest and possession on all bulls. We retain the right to acquire semen at collection cost for use only in our herd. Our name will be kept on the registration papers so that we can register offspring at no additional cost. See lot A for details on Patriot.

Delivery

We offer free delivery on bulls for the first 300 miles beyond Bartlett, NE. We will assist with trucking nationwide to central points as we are able. Buyers are responsible for arranging pickup of heifers at Wagonhammer. (If the buyer also purchases bulls, we can often fit them on the load.)

We offer a \$100 per bull discount on all bulls picked up on sale day or the following day.

Bull Buyer's Volume Discount

On 5 or more bulls – 5%

On 10 or more bulls – 10%

Online Bidding & Broadcasting

The sale will be broadcast live with online bidding on DV Auction. Please register to bid at least 24 hours before the sale. See page 4 for complete information.

\$100/bull discount to any bulls picked up by the buyer on sale day

Backed by one of the nation's Best Cowherds, continuously improved since the 1960's

AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. Accuracy will range from 0 to 1 with an accuracy closer to 1.0 indicating higher reliability. Accuracy is impacted by the amount of information that is included in the analysis including individual genotype and performance records as well as number of progeny and ancestral records.

PRODUCTION

Calving Ease Direct (CED), expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for post-weaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Dry Matter Intake (DMI), expressed in pounds per day, is a predictor of difference in transmitting ability for feed intake during the post-weaning phase, compared to that of other sires.

Yearling Height (YH), expressed in inches, is a predictor of a sire's ability to transmit yearling height compared to that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting scrotal size compared to that of other sires.

MANAGEMENT

Claw Set (Claw), expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes compared to another sire.

Foot Angle (Angle), expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees at the pastern and appropriate toe length and heel depth compared to another sire.

Docility (DOC), expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

Pulmonary Arterial Pressure EPD (PAP), expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score to decrease the risk of progeny contracting high altitude disease most commonly experienced at 5,500 ft or greater in elevation.

Hair Shed EPD (HS), expressed in units of hair shed score, with a lower EPD being more favorable. This indicates a sire should produce progeny who shed their winter coat earlier in the spring and has improved environmental adaptability in heat stressed areas and grazing endophyte-infected (hot) fescue.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), expressed in pounds of calf weaned, is a predictor of a sire's genetic merit for milk and mothering ability in his daughters. In other words, it is the part of the calf's weaning weight attributes to milk and mothering ability.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

CARCASS

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value Indexes, expressed in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning by decreasing mature cow size and improving docility, foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), expressed in dollars per head, provides the expected difference in future progeny pre-weaning performance from birth to weaning.

Energy Value (\$EN), expressed in dollar savings per cow per year with a larger value being more favorable. It assesses differences in cow energy requirements, due to maternal milk and mature cow size.

Feedlot Value (\$F), expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle through the feedlot phase and sell on a carcass-weight basis.

Grid Value (\$G), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), expressed in dollars per carcass, represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

Combined Value (\$C), expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.

WAGONHAMMER

The Total Performance Brand *Ranches*

Fellow Ranchers,

It is my pleasure to give you a little background on the development of the 2026 Wagonhammer offering. These bulls have been developed with their future in mind, and with an eye toward giving you the most return for your genetics investment.

All of the bulls were started on feed slowly, stepped through a series of rations to ensure digestive and hoof health, and limited to less than 30% starch in the bull grower ration. This set of bulls have been sorted on constantly, culled ruthlessly, and developed cautiously. The aged bulls grazed summer range last summer and were grown this winter in a large test lot with plenty of room, not in a typical feedlot setting. By sale day, all of the bulls will be turned out on pasture and meadow to travel and exercise for their long-term soundness.

The Wagonhammer and Great Plains crews take bull selection and development seriously; and we all expect these bulls to work hard in the upcoming breeding season. As always, we welcome your feedback and appreciate your support. Please feel free to reach out with any questions you have about the development process.

Thank you,

Jeremy Martin, Ph.D.

Great Plains Livestock Consulting, Inc.

Note on weights – Birth weights on embryo transfer animals are not meaningful because the ET process leads to larger weights. We are printing ET to the right of the birth weight for ET animals. WW and YW EPDs are comparable between programs, but actual/adjusted weaning and yearling weights are not due to management and reporting differences. Birth weights and weaning weights are not even comparable between our spring and fall herds because of the environment and forage availability being so much different. Fall weights are consistently lighter.

CALVING EASE

We pride ourselves on providing you, our valued customers, with bulls that will produce calves that are born easily, get up quickly and start growing. We also recognize that not every bull needs to breed heifers and so we have created a system to identify the potential Angus heifer bulls in the sale via a star rating system. Please use the key below to help understand our recommendations on how each bull can be used based off their EPDs, actual performance, dam's production record and pedigree history.

★★★★★ 5 STAR CALVING EASE

No doubt heifer bull. He was born light and unassisted. His EPDs are elite for calving ease. His sire, dam and maternal grandsire have a history of calving ease.

★★★★ 4 STAR CALVING EASE

EPDs for CED and BW suggest he should work well on heifers. Born with moderate birth weight and born unassisted. Pedigree has history of calving ease.

★★★ 3 STAR CALVING EASE

EPDs for CED and BW suggest calving ease. Born with either heavier actual weight unassisted or smaller actual weight with abnormal presentation. Can be used on heifers with caution especially that are more developed prior to first calving (weighting 1150+). These bulls will fit well to breed wet two year olds. Pedigree has calving history.

Angus Bulls without highlighted calving ease – bulls that aren't highlighted for calving ease will have typical Angus characteristics for easy calving but their numerical indicators and history tell us that they will work best on cows to maximize growth.

CERTIFIED ANGUS BEEF

The American Angus Association and Certified Angus Beef have launched a program to recognize bulls with the genetic potential to expand the supply of CAB beef in the marketplace.

REFERENCE *Sires*

Purebred SM

We firmly believe WAGR Patriot 1008J (ASA# 3961833) is the best Simmental bull in the breed and one of the very best animals to ever walk the Wagonhammer Ranch. Due to using him so hard over the last 4 years and having countless daughters in our herd, we have to diversify our gene pool so we are offering him to the public. Patriot's impeccable phenotype and herd bull presence captivate everyone who sees him, and he has had remarkable consistency in breeding the same into his progeny. His EPDs have only gotten better as more progeny data has been turned in. He is in the top 1% of the breed for WW and REA, 2% for YW, and 4% for TI. We will have 23 of his sons in our production sale (yes, 23!), and as good as his sons are, his daughters are even better. We truly believe he has the potential to become the most heavily used sire in the breed. **We're selling full possession and 2/3 semen interest in him. (Wager Cattle Co. is retaining 1/3 semen interest.)**

Commerce is a genetic outlier in the Angus breed for offering calving ease with true performance and enormous eye appeal. His sons are big scrotaled and well muscled with massive rib shape. They have been very high rationing for both weaning and yearling weight. His daughters are broody with great teat and udder quality. There aren't many places in the country where you can find a sire group of this size and caliber.

S ARCHITECT 9501

There is no bull who epitomizes Total Performance and the direction our program is going better than Architect. He does it all and is THE leading proven sire in the breed for the metrics that determine cow-calf profitability. He transmits muscle, capacity, fleshing-ability, and top-of-the breed performance to his progeny. His dam comes from 5 generations of very productive, great uddered cows. She has raised 7 calves at an average weaning ratio of 118. Architect's performance is real, as has been proven here and in top herds around the country. His top 5% of the breed weaning EPD has 95% accuracy with about 4,000 progeny records backing it up. Remarkably, his mature size is slightly lower than breed average, leading to cows with lower energy and feed requirements who we expect to breed back easier and stay in the herd longer.

HOFFMAN HIGH ROAD

High Road is a curve-bending calving ease sire whose progeny grow extremely well and make it to the top quarter of the breed for growth at yearling. His dam is the iconic HA Rito Lady 3839, who is also the dam of Thedford, Bar None, and the grand-dam of RiseAbove. He has a lot of rib shape and body and stands square at the ground with good feet. He adds mass and breed character.

WAR Benchmark K322 is a home-raised sire who has lived up to our high expectations for him and more. His Pathfinder dam, WAR In Focus X224, raised 10 natural calves at a 104 ratio, and she probably has more influence in our gene pool than any other cow. Her descendants are too many to list, as they have been productive cows who have multiplied. In addition to being the dam of this sire, she is also the cow that WAR Currency goes back to, and she is the great-granddam of WAR Architect N190 (Lot 67), one of the top candidates to start the sale with this year. When Jeremy Martin, our nutritionist, was riding through summer pastures with us, he stopped and said "Whoa, who's that bull?" when he saw Benchmark. He's transmitted that look to his progeny and offers a very balanced, complete data set with proven performance. His indexes for cow-calf profitability put him in the top 20% and 25% of the breed.

Connealy Way Maker is a wide-made, no-holes bull. His dam is a donor at Connealy Angus, and he has proven to be an elite cow-maker whose proven heifer pregnancy, teat, udder, and functional longevity numbers are as good as any sire in the breed. His females are moderate-sized, easy keepers. He adds in excellent marbling and ribeye numbers to top off his profile.

He is a unique bull who adds pounds, muscle, bone, and frame. He has reached proven status in our herd, with 39 calves weaned and records submitted. His progeny have been very high ratioing and as we have turned in the data, his EPDs have gotten better. He ranks in the top 10% of the breed for weaning and yearling growth. He is also in the top 5% for ribeye area, and you can see that when evaluating his progeny.

Currency is a calving-ease sire who offers the masculinity, natural thickness, rib shape, and depth that aren't normally offered in a calving-ease package. When ranchers come to our place, their eyes are consistently drawn to the Currency progeny, and they have been among our top sellers. He is in the top 10% of the breed for maternal weaned calf value (profitability.) The fertility, productivity, teat and udder quality, and longevity in his maternal lineage is unmatched.

When it comes to explosive growth from a calving ease sire, no bull can match Dynamic. He sires overpowering physical presence with base width, thickness, and dimension in an eye-appealing package. His spread from birth to weaning and yearling looks too good to be true, but we have had enough progeny to know that it is real. Due to his popularity and the thousands of records that have been submitted, his EPD accuracies are over 90%. Dynamic also adds marbling, and his daughters have ideal teat size and udder suspension.

Reality is a Total Performance sire from the Woodhill program who is in the ABS bull battery. He combines cow power, performance, and efficiency and stems from the great Evergreen cow family. He keeps mature size and dry matter intake in check. Phenotypically, Reality progeny have great body shape, dimension, and power. Numerically, he has one of the most complete EPD profiles you will see, as he is in the top 1/3 of the breed for about every trait and index and has no holes.

Imprint has been a great addition to our program. He's a long, deep bodied bull with a lot of rib capacity. His progeny have been good performers. His son, Lot 132, who had a 128 weaning ratio among 128 contemporaries, is one of the top candidates to start the sale. He also sired the top weaning weight heifer at Pilakowski Angus in the western Sandhills. We believe Imprint progeny will improve our cow herd and yours, with top-of-the-breed fertility, longevity, teat size, udder suspension, claw set, and maternal weaned calf value.

Maverick is one of those studs who is just "built different." Nobody-no matter their breed preference- has been through our herd sires without admiring him. He has flawless structure and athleticism, along with a lot of masculinity, muscle, and overall eye appeal. He is a PA-free son of Badge and the famed LT Brenda cow family. He ranks in the top 2% of the breed for teat size and udder suspension. You want these daughters in your herd, and a total dispersion of the Charolais heifers gives you the opportunity to buy the very best.

Purebred SM

We firmly believe WAGR Patriot 1008J (ASA# 3961833) is the best Simmental bull in the breed and one of the very best animals to ever walk the Wagonhammer Ranch. Due to using him so hard over the last 4 years and having countless daughters in our herd, we have to diversify our gene pool so we are offering him to the public. Patriot's impeccable phenotype and herd bull presence captivate everyone who sees him, and he has had remarkable consistency in breeding the same into his progeny. His EPDs have only gotten better as more progeny data has been turned in. He is in the top 1% of the breed for WW and REA, 2% for YW, and 4% for TI. We will have 23 of his sons in our production sale (yes, 23!), and as good as his sons are, his daughters are even better. We truly believe he has the potential to become the most heavily used sire in the breed. **We're selling full possession and 2/3 semen interest in him. (Wager Cattle Co. is retaining 1/3 semen interest.)**

Calving Ease ★★★ – This stud has been a standout since birth, commanding a 135 weaning ratio and 121 yearling ratio among progeny of 1st calf heifers. He is just “built different” and has true herd bull presence, scrotal circumference, and dimension. Lot 1’s dam has a fabulous Architect bull calf for her 2nd calf so look for him next year. His maternal granddam E560 is a donor and maternal sister to WAR Cavalry, the popular ORlGen sire we raised. Remarkably, even though Cavalry was born 12 years ago, he is still in the top 4% of the breed for YW EPD and \$Beef. E560 is also the granddam of featured spring bull Lot 133. Numerically, Lot 1 is an elite curve bender who is near the pinnacle of the breed for Weaned Calf Value (\$W.)

Special bull out of a donor who is a maternal sister to our WAR Currency herd sire. We expect the males from this bull to top the scales at weaning and the daughters to have near-perfect feet, udders, and longevity. This top 1% SM and SW herd sire is a PERFECT fit for what the industry is calling for right now-top end growth on males and daughters that will successfully rebuild the cow herd.

A standout since birth, he had the Top WW & YW in the fall herd. We are very high on his donor dam. She will have the largest group of bulls out of one cow that we've ever had in the 2027 sale. Lot 4 has herd bull presence and is a big ribbed, high capacity performance bull. His ability to be in the top 3% of the breed for WW EPD, while having breed-average mature weight and lower than breed-average cow energy requirements, is special.

| 4% | | | | | 10% | 15% | | |

Massive ribbed and scrotaled, high octane bull. His growth EPDs are at the pinnacle of the Angus breed. They are backed up by his actual performance: 4th top fall YW and ratios of 117 and 114 for weaning and yearling.

Monster ratioing bull with 129 and 119 weaning and yearling ratios and the 3rd Top WW & YW in the fall bulls. His growth EPDs confirm he is one of the breed's elite. He comes from a line of old, productive cows and consequently is in the top 10% of the breed for functional longevity (the number of calves a sire's daughter is expected to produce by 6 years of age compared to other sires.) His great-granddam was a Pathfinder who weaned 12 calves at a 104 ratio. Since top-end growth and cow longevity are generally antagonistic, his combination of the two is special.

SHOW STOPPER! This bull is just flat, stop-you-in-your-tracks, good looking. He's built incredibly thick with a deep chest floor and a big hip. He has impeccable feet, structure and flexibility. He knows how elite he is and is always posing with his head held high. His Upgrade-sired granddam was a donor who raised 9 natural calves at a 107 average weaning ratio. Numerically, he has a very complete data profile. His indexes are deceiving because marbling has such an outsized influence on \$B and \$C. In the real world, this bull will make you money through siring sons and replacement heifers that top the market.

Strong ratioing bull out of a very productive cow family. His dam has raised 7 calves at a 105 ratio, his granddam stayed in our herd until age 12, and his great-granddam was a Pathfinder cow. Not surprisingly, his EPDs for foot, teat, and udder structure are very strong. He is the replacement-making kind.

Thick made bull with a lot of rib shape and dimension. He excels at weaning with a 110 ratio and top quartile of the breed EPD. The long-lasting cows in his pedigree and his EPDs point toward him being an excellent female maker. He has strong marks across the board including heifer pregnancy, functional longevity, teat, udder, and claw.

Calving Ease ★★★★★ – Pathfinder WAR In Focus X224 probably has more influence in our gene pool than any other cow. Her descendants are too many to list so here are a few highlights: She is the dam of WAR Benchmark K322, the great-granddam of WAR Currency, and the great-granddam of Lot 67. Lot 20 has her in his pedigree twice. He was a high ratiating bull, and he's sure to leave fertile, long-lasting daughters.

Calving Ease ★★★ – Thick-made bull with some added frame. There is a lot of cow power in his pedigree. His granddam Z054 is prepotent for transmitting top-end growth genetics. He'll leave steers that pay and cows that stay.

Thick-made, powerful cowboy bull. He ratioed 109 at both weaning and yearling. He puts together a very complete data profile with excellent maternal attributes and longevity to go along with his superior growth. It's no surprise that he ranks in the top 10% of the breed for SM and SW.

Calving Ease ★★★★★ – Moderate framed meat wagon. This bull packs a lot of body and rib into his stature. He is a calving ease bull who doesn't "look" like a calving ease bull. The cows in his pedigree have less mature weight and energy requirements than most, even though they're strong milkers.

Grassland cattle are known for their superior phenotype, and this bull does not disappoint. He ratioed 109 and 111 at weaning and yearling and is towards the top of the breed for those traits. He also excels in docility, claw set, and ribeye area. His dam has been very productive, weaning 6 calves at an average ratio of 108.

Calving Ease ★★★ – This bull has a near-identical pedigree to our 2023 top selling bull, WAR Sandhills. He is maternally oriented, with good growth through weaning and superior fertility and longevity in the proven dams in his pedigree and his genetic predictions. This vaults him to the top 2% of the breed for \$M.

This coming 2-year-old bull has been a standout for a long time. He's stout featured and muscular with excellent structure. He's cocky and a bit nervous. There are no docility issues in his pedigree so we chalk it up to being a virgin 2-year old bull with a lot of testosterone. He should be fine going to the right home once he gets worn out a bit. He has one of the more complete set of EPDs in the sale, including being in the top 2% of the breed for \$F and 10% for \$C. His Black Granite dam is one of the best cows on the ranch, having raised 6 calves at an average weaning ratio of 109.

Similar to the other Way Makers, he's just rock solid and fault-free. His performance numbers are very good, and his maternal strength is top-notch, reaching the top 10% for functional longevity and top 15% for \$M.

Speaking of rock solid, take a look at this bull!! He's built like a brick. His Upgrade-sired dam raised him at 12 years old and did a heck of a job, weaning him off at a 105 ratio. He is elite for maternal weaned calf value and is a true Wagonhammer Total Performance bull. We recommend him with the utmost confidence.

This husky bull had 104 and 110 weaning and yearling ratios. His maternal granddam was the Pathfinder S A V Brilliance-sired B181. He has great growth and excels at the traits relevant to cow-calf producers.

Calving Ease ★★★★★ – Starting off the spring division with a bang, he comes from one of our most promising young cows (a Gulfstream daughter out of our legendary Upgrade X280 donor.) I took the accompanying picture of her shortly after Lot 55 was born. He had explosive growth to weaning and achieved a 109 weaning ratio. He exhibits Total Performance, where he excels in almost every trait and is very difficult to fault. He achieves rare air with his claw and angle EPDs, in addition to his \$M and \$W figures. His marbling and \$C numbers are pretty darn good, too.

Another Commerce son with explosive growth, he is only 1 pound below Lot 57 on his WW EPD and has the 3rd Top WW Ratio among spring bulls to back that up. His genetic predictions are great across the board, and he has the #1 weaned calf value index of all bulls in the sale.

Without a doubt, this is one of the studs of the offering. He is heavy muscled with a great top and a lot of rib shape and depth. Structurally, everything is right. He has the herd bull presence. He has a 115 weaning ratio in a large contemporary group of 128 bulls and tied for the 5th top yearling ratio. Numerically, he is complete and elite for WW, YW, functional longevity, docility, and ribeye area.

Calving Ease ★★★★★ – On the hoof, this bull has always had muscle expression and eye appeal, aside from his short ears. He ratioed 113 and 111 at weaning and yearling. He does all of this in a sure-shot calving ease package (tied for the top CED in the sale) with added frame and growth. He's in the top 10% of the breed for \$W.

Calving Ease ★★★★★ – No-doubt curve-bending calving ease bull with attractive phenotype. He has a superb maternal pedigree, with his maternal WAR Hero granddam being a Pathfinder who raised 9 calves at a whopping 111 average ratio-one of the best production records ever achieved at Wagonhammer. It's no surprise his teat, udder, and functional longevity predictions are toward the top of the breed.

In person, this is an excellent structured bull with good muscle expression. He's one of only two Angus cattle in the sale (Lot 42 out of Grassland's dam being the other one) who is out of a cow we didn't raise. We purchased her as one of the elite heifer calves at the Connealy Angus sale. Lot 62 is very complete and has elite numbers for WW, YW, claw, angle, ribeye area, and \$W.

Calving Ease ★★★★★ – Bigger framed curve-bender out of a Pathfinder Black Granite daughter who has raised 8 calves at a 105 weaning ratio. His heifer pregnancy and functional longevity numbers are near the top of the breed, as with his weaned calf value index.

It's hard to put into words how much I like this bull. He's been a man among boys phenotypically for his whole life with huge performance, muscling, and testicles. He stacks the most impressive lineup of cows in his pedigree of any animal in the offering. His Warwagon dam is a Pathfinder, his granddam A135 has weaned 10 calves and is the great-granddam of WAR Currency, and his great-granddam X224 is the aforementioned Pathfinder matriarch who is the dam of WAR Benchmark K322.

Calving Ease ★★★ – There is power in the blood! His dam has weaned 9 calves and is A.I. bred to have her 10th on March 1st. His maternal granddam and great-granddam are both Pathfinders. Fittingly, he is high for \$M and has tremendous performance numbers.

High ratioing bull (104 for weaning and 105 for yearling) who is predicted to sire top-end weaning and yearling weights. He's one of the bigger framed Angus bulls in the offering for those who are wanting to add some stretch to their cattle. He's elite for the factors impacting cow-calf profitability, as evidenced by his top \$M and \$W figures.

Calving Ease ★★★ – Good-bodied bull who exudes Total Performance. He has a special growth curve of being born easy, growing rapidly to weaning and yearling, and then tapering off to a mature cow size well below average. That, combined with the longevity of the cows in his pedigree, ranks him at the pinnacle of the breed for \$M and \$W. His top 15% carcass weight figure helps him pencil very well for feedlot profitability as well.

Calving Ease ★★★ – I could almost copy and paste the previous footnote. Architect is a special sire who is doing a lot of good for cow-calf producers. This is a really high performing bull with 119 and 110 weaning and yearling ratios. His Pathfinder dam is definitely on the short-list as a donor prospect. Lot 72 has the unique status of being in the top 1% of the breed for both \$M and \$W!

Calving Ease ★★★★★ – Calving ease bull who really puts a lot of good things together in one package. He has great growth EPDs backed up by 110 and 108 weaning and yearling ratios. He is a bigger framed, stretchy bull. His dam has been very productive raising 8 calves at a 103 average ratio, and his teat and udder EPDs are strong. He excels at weaned calf profitability.

Calving Ease ★★★ – This bull is a great bet to improve your performance at weaning: He ratioed 106 among 128 contemporaries, his WW EPD is in the top 25% of the breed, and his Pathfinder dam has weaned 5 calves at an average ratio of 105. At the same time, he is expected to produce easy-keeping cows with very low energy requirements.

Calving Ease ★★★ – Muscled up, big scrotal bull with a masculine crest. Similar to Lot 74, he excels at weaning time with a top 25% of the breed EPD and a 109 ratio in a huge contemporary group. We expect him to also produce moderate mature-sized cows who stay in the herd a LONG time. His Pathfinder granddam WAR Hero A380 (also the granddam of Lot 61) has the legendary nursing ratio of 9 calves at 111. In addition to his top 1% of the breed \$M, he also has good carcass figures and numbers across the board.

Impressively muscled bull with a loin that pops, this bull is also a mile long. He has admirable performance with 102 and 106 weaning and yearling ratios. He also has superb docility and top-of-the breed teat and udder expectations. Another bull who is bred for cow-calf profitability and has indexes that show it.

One of the standouts of the sale, he is a good structured, wide-based bull with a lot of muscle all the way down his top and through his hind quarter. He tied for the 5th top YW ratio. His dam has a perfect udder, and he projects among the breed's best for weaned calf value.

Calving Ease ★★★★★ – This bull is a personal favorite because of how much he brings to the table in a calving ease package. He is built solid and muscular with a lot of eye appeal. His dam is a beautiful Pathfinder cow who stood out last summer in the pasture. He ratioed 103 at yearling among the bulls that made the cut for the sale and has an excellent number for maternal weaned calf value.

This bull will add stretch and pounds. He is athletic and covers his tracks with ease. His top 5% of the breed WW EPD matches up with the 108 weaning ratio he achieved among 128 competitors. He comes from a line of long-living, productive cows, including his great-granddam who is a Pathfinder. He figures to add a lot to the bottom line of cow-calf producers.

Calving Ease ★★★★★ – Here is one of the top bulls in the sale. He is long bodied with a great top and a very attractive muscle pattern. He pounded the scale at weaning with a 110 ratio. His cow-calf profitability metrics are elite, leading to his top \$M and \$W numbers. Included in that is his functional longevity EPD in the top 4% of the breed.

This bull is a no-doubt stud in 3D. He possesses the 4th top adjusted WW and YW. His Pathfinder dam has raised 6 natural calves at a 115 ratio and is the granddam of WAR Albion, a herd sire we sold to Doug Booth Family Angus and used in our own program. Look for him to sire stout, high performing calves with eye appeal.

Calving Ease ★★★★★ – Outstanding sale feature here. You will be challenged to find a better curve-bender anywhere. He combines his unbelievable birth to yearling spread with a phenotype on the same level: He has great muscle shape, masculinity, structure, and true dimension. He ratioed 108 and 109 at weaning and yearling.

Calving Ease ★★★★★ – Here is another big-time curve bender! Even though he was born light, he registered a whopping 118 weaning ratio among the bull calves of 1st calf heifers. His has terrific weaning and yearling growth numbers. His daughters are expected to have longevity as moderate-sized, heavy milking cows with middle of the road energy requirements. His Upgrade granddam was a top-producing Pathfinder cow. This all adds up to top-of-the breed \$M and \$W values for cow-calf producers.

Calving Ease ★★★ – Absolutely massive bull. This bull crushes the scale while adding length and frame—he is a mile long! He had the top YW and 2nd top WW at nearly 800 pounds. His dam needs no introduction to those familiar with Wagonhammer—the great WAR Upgrade X280. She has weaned 9 natural calves at an average ratio of 108 and has more total progeny (55) than any other Wagonhammer cow. She is still in the herd and looking good at age 16!

Phenotypic standout with a lot of natural thickness and outstanding performance. He has T-3rd Top YW Ratio and the 5th Top WW Ratio. We expect his daughters to be easy-keepers with elite heifer pregnancy rates and cow longevity. His maternal weaned calf value number is spectacular.

Close to 800 pounds, he's the top adjusted weaning weight bull in the sale. His dam (also the dam of Lot 4 and 104) will have our biggest ever set of progeny from one dam in next year's sale. With Wagonhammer genetics on both sides of the pedigree, he is a good representation of our Total Performance, no holes breeding objective. He has excellent growth, yet projects to leave females that are right-sized. He excels with scrotal circumference, heifer pregnancy, functional longevity, docility, claw set, and foot angle. It all adds up to him ranking in the breed's elite for maternal weaned calf value and weaned calf value.

Calving Ease ★★★★★ – This stud is a sure-fire calving ease bull whose phenotype and growth can compete with any bull out there, regardless of how big they were born. His awesome Upgrade granddam weaned 11 calves at a 103 ratio, and his great-granddam was a Pathfinder cow. This bull can do it all.

Calving Ease ★★★★★ – Here is another outlier who bucks the narrative of what some people think is possible for calving ease performance and muscling. He's a great-looking, very dimensional bull with top-of-the breed weaning and yearling EPDs. He also adds in great carcass numbers and index numbers across the board.

Calving Ease ★★★★★ – Here is one of the highest growth calving ease bulls you will ever see. He had the 2nd top weaning ratio and T-3rd top yearling ratio. His EPDs are in the top 2% of the breed for WW and 3% for YW. Impressively, even with all of that growth, he projects to leave females with longevity and good teat and udder structure. His donor granddam raised his mother at age 10 and had an average weaning ratio of 107 on her calves. His weaned calf value index is elite.

Calving Ease ★★★★★ – This full brother is smaller in stature but has tremendous phenotypic quality. He's a stout-made, bold ribbed, very dimensional bull. He has T-Top CED in the sale and is toward the top of the breed for heifer pregnancy, marbling, and grid value.

Calving Ease ★★★★★ – Very well balanced, complete bull, he offers a lot phenotypically and numerically. He is a no-doubt calving ease bull with great performance. We expect him to leave behind great females who are fertile, docile, good-uddered, and good milkers. As with most of E241's progeny, he is also elite for marbling.

Calving Ease ★★★★★ – Sired by the hit sire SG Salvation, this calving ease bull has the feedlot and grid merit that reward retained ownership in his calves. Keep in mind that the in vitro fertilization process creates much larger birth weights than natural, rendering the actual birth weights meaningless. I would have no concerns using him on our heifers.

Calving Ease ★★★★★ – Man in Black progeny have been in high demand around the country. This calving ease bull has a lot of extension. His progeny are predicted to have good growth to weaning and yearling. Meanwhile, his daughters are expected to have smaller mature size and to have less energy requirements than most cows, even though they're expected to milk heavily. That, combined with his high marbling number, lead him to be an extremely high indexing bull across the board.

Calving Ease ★★★★★ – A sure-shot calving ease bull with many favorable maternal traits while also topping +1 for marbling, he has a lot to offer. His daughters figure to have superb fertility, milking ability, teat size, udder suspension, and hair shed. His CED is tied for the top in the sale, and he is also superb for feedlot value.

This bull hits the trifecta with his dam, maternal granddam, and great granddam all achieving Pathfinder status. That's a difficult feat to pull off, and he's the only bull in the sale with that designation. He's a moderate framed, really thick-made bull. He offers a very complete data set and is elite for teat, udder, longevity, docility, and ribeye area.

Here's a dude! He crushed the scales at weaning and yearling, achieving a 117 weaning ratio among 128 contemporaries and a 111 yearling ratio among the sale bulls. He also has a phenotype that will attract the eyes of feeder cattle and replacement heifer buyers. He's out of a very productive Complete daughter.

Good performance bull who is long bodied and smooth moving. He is out of an excellent young Complete granddaughter. Statistically, there is no other bull who is predicted to improve teat size and udder suspension as much as this bull. His daughters are also expected to have great longevity.

Here's a stud that is one of the top candidates to start the sale. He is off the charts for performance, and from looking at him, you could never guess that he is a young April 1st born calf. He is the #1 ratioing bull for both weaning and yearling. For weaning, he had 128 contemporaries (bull calves out of mature cows) and was remarkably able to ratio 128 in that group. Then many bulls were cut so the yearling contemporary group only contained the high caliber bulls that made the sale. He was still able to ratio 123 in that group. When I received the genomic results back, I was excited to see that the genomics recognized his greatness. He has the top YW EPD in the sale and is top 2% of the breed for WW EPD also. One of the really unique things about him is that even with all of that growth, his daughters still project in the top 15% of the breed for functional longevity. He also has superior teat, udder, and \$W figures. His HF Tiger-sired granddam C013 is a beautiful cow who has weaned 8 calves at a 104 ratio. I considered flushing her even before Lot 132 came onto the scene.

LOT 131: OUT OF SALE

LOT 133 – WAR COMPLETE N096

LOT 134: OUT OF SALE

LOT 136: OUT OF SALE

LOT 137 – WAR COMPLETE STUD N295

Calving Ease ★★ – This bull is “all there” phenotypically and boasts 109 and 110 ratios for weaning and yearling. You will find him in the pen, even though he is one of the youngest bulls. He comes from a fabulous line of cows. His Pathfinder dam has weaned 10 calves at a 104 ratio. His granddam was also a Pathfinder who raised 11 calves at a 104 ratio. I don’t think you can go many places and buy a bull like that anymore from proven cows that have done it the old-fashioned way. He ranks in the top 15% for \$W and gets bonus points for marbling, too.

Calving Ease ★★ – Sleep-all night calving ease bull with top-notch maternal qualities. His maternal granddam was a Pathfinder. He will sire moderate mature sized, good structured, very energy efficient cows who are a great bet to stay in the herd forever. His functional longevity EPD is in the top 3% of the breed, and he’s in the top 2% of the breed for maternal weaned calf value. As an added bonus, he is also high in marbling.

Calving Ease ★★ – These Annuity sons are big, stout-featured growth bulls! Lot 139 had ratios of 111 and 112 at weaning and yearling. That tied for the 5th top YW ratio in the sale. He's an athletic, bigger framed bull, who carries muscle nicely down his top. Numerically, his growth EPDs, scrotal circumference, and docility are elite. His Pathfinder granddam E229 has produced two herd sires and is also the granddam of Lot 6.

Putting a bow on a very consistent sire group, he is another scale-crushing bull who ratioed 116 at weaning and 109 at yearling in very competitive contemporary groups. These bulls add frame, bone structure, muscle, and pounds. Lot 142 has a Pathfinder great-granddam. Numerically, he is superb for his growth EPDs, udder suspension, functional longevity, and ribeye area. He reaches the top 4% of the breed for weaned calf value.

Long bodied bull with a good, square hip. It's not surprising that he has a high quality phenotype given that he has both Grassland and X280 on the bottom side of his pedigree. We expect his progeny to excel with growth to weaning and yearling and then moderate in their mature size.

Wide-based, heavy muscled bull with some real shape and dimension. He's been an excellent performer with a 103 weaning ratio and an impressive 108 yearling ratio among the bulls that made the sale. His maternal great-granddam was a Pathfinder. His genomic-enhanced EPD's recognize his superior growth genetics and put him in the top 10% for \$W.

High quality phenotype bull. He has great structure and athleticism and looks like his Gulfstream x X280 sire with a lot of style and a loin edge that pops. He ratioed 106 at weaning and has a Pathfinder maternal granddam A152 who raised 7 calves at a 106 average ratio. She is also the granddam of Lot 15 and the great-granddam of Lot 153.

Calving Ease ★★★★★ – Sleep-all-night calving ease bull who ratioed 105 at weaning and above average at yearling among a very challenging contemporary group. His dam is a Pathfinder who has raised 5 calves at a 109 ratio. His great-granddam is also a Pathfinder. His CED is tied for top in the sale. Fittingly, he ranks in the top 4% of the breed for maternal weaned calf value.

Calving Ease ★★★★★ – Calving ease bull with very good growth to weaning. His growth curve tapers off after yearling and he's expected to leave moderate-sized cows with below average feed requirements. His maternal line is strong for fertility and longevity, and his indexes for \$M and \$W are elite.

Calving Ease ★★★★★ – This is the 7th year of having Warwagon progeny in the sale, and this is probably your last chance to ever buy a Warwagon-sired bull! He is a good one to go out on with Warwagon's trademark thickness, strong top, and eye appeal. He ratioed 103 at yearling in this competitive group of sale bulls. His prolific Pathfinder great-granddam is also the granddam of Lots 15 and 147. He ranks in the top 20% for weaned calf profitability.

Calving Ease ★★★★★ – Thick-made, good-looking bull, especially with being one of the younger bulls in the pen. He is good structured and fluid in his movement. He had 108 and 102 weaning and yearling ratios. His great-granddam is the Pathfinder Z054 who always gets performance transmitted through to her progeny. He comes to the top for functional longevity and ribeye area.

Absolutely massive, belly-dragging bull. This bull has as much rib capacity as any bull you will ever see, and I don't think that's an exaggeration. He had the 3rd highest WW and 2nd highest YW among the fall bulls. He outweighs them all now. His great-granddam is the legendary WAR Hero A380 cow who weaned 9 calves at a whopping 111 average ratio in our Angus herd. His EPDs appropriately rank him near the pinnacle of the breed for WW, YW, ADG, MWW, and REA. This is a bull that can do it all.

 Huge birth to yearling spread in this performance bull with a 107 yearling ratio. He has so many traits in the top 10-15% of the breed, it would take up too much space to print them all! There are a lot of old Wagonhammer Angus cows with longevity on the bottom side of his pedigree. He's a great choice as a dual purpose sire to raise feeder steers and replacement heifers.

 This nice profiling bull is exceptionally flexible and covers his tracks with ease. Eye appeal and elite structure come in his pedigree with Patriot on the top side and Complete and our legendary Upgrade X280 cow on the bottom side. He is in the top 10% of the breed for his growth EPDs, TI, and docility.

This is a real stud who you have to see in 3D to fully appreciate. He is loaded with thickness and dimension. I fell in love with this bull in summer pasture, and he has not disappointed as he's matured. He boasts the top WW and YW among the fall bulls. We're so high on his granddam X280 that we have produced more calves out of her than any other cow (55.) Numerically, he ranks among the best the Simmental database has to offer for WW, YW, ADG, MWW, DOC, CW, and TI.

 Here is a dual purpose bull who does about everything right. Expect him to sire calves that are born easy, grow with vigor, and can be very nice replacement females who stay in the herd.

Backed by one of the nation's Best Cowherds, continuously improved since the 1960's

What a way to start the spring division! This stud possesses the Top WW EPD and YW EPD among all Simmental bulls in the sale, and he backed that up with the 2nd top weights for weaning and yearling among the spring bulls. He is the highest WW EPD bull that Patriot has produced, and his YW EPD is even higher than Patriot's is.

Several people have asked me for recommendations on Simmental bulls that can be used on heifers, and normally that is a struggle because that's just not what we're breeding them for. However, this a bull that I have confidence in to do that. Both he and his dam were born light at birth and have elite calving ease and birth weight EPDs. He will also add carcass merit to your cattle, ranking in the top 4% for yield grade and top 15% for ribeye.

When I made the picture list at the beginning of January, I had this bull on the list and then removed him because I thought there were too many Patriot sons on the picture list. That was a mistake. He went on to have the top yearling weight in the spring bull division. Look for his video because I promise you won't be disappointed-he is a good looking rascal! He has top 10% of the breed performance numbers. I love his pedigree, too, as The Judge was the best Simmental sire we had used before Patriot, and his Pathfinder granddam WAR In Focus X224 has more influence in our Angus gene pool than any other cow. She is the dam of WAR Benchmark K322 and the great-granddam of Lot 67. She is also the matriarch that WAR Currency goes back to.

With very stiff competition, he's been an excellent performer against his peers, including a 105 weaning ratio. He's out of an excellent young The Judge daughter. He projects to sire top-of-the breed performance, and he also adds marbling to vault him to a TI of nearly 95.

Here's a one-time opportunity to buy a daughter of our great X280 donor. We have flushed her more than any other cow, and she is still in the herd and looking good at age 16. In addition to her phenotypic quality, lot 193 has some very unique attributes. She has top-notch calving ease genetics, and like her mother, has foot quality and EPDs that are as good as any female in the country. She puts together a very balanced and complete data profile. X280 has an uncanny ability to transmit structural correctness, natural thickness, rib shape and depth, a square hip, and overall eye appeal to her progeny, and we expect this heifer will do the same.

Here's a beautiful heifer whose 1st time mother did a great job raising her and stuck A.I. again as a wet 2 year old. Her maternal grand-dam is still in the herd at age 9, has never missed weaning a calf, and has been sticking A.I. Lot 194's docility is top-notch, and her SM and SW are towards the top of the breed.

Opportunity to acquire coveted genetics from Man in Black and our prolific Arsenal E241 donor, who has an enviable production record of 6 calves at a 111 ratio on her natural calves. This is the top weaning weight heifer in the group, clocking in at 650 pounds. She is feminine and elongated. Many are trying to frame up their cattle in this "pounds pay" market, and she will do that, while offering a great set of EPDs across the board. Expect her to have a really nice udder and be a great milker who will wean heavy calves.

Another opportunity to acquire a heifer from our donor program. She is out of the same donor as Lot 195 and is sired by Connealy Way Maker. She is a maternal special, the top \$M heifer in the sale. She will be a big-time teat and udder improver, and she is in the top 1% of the breed for heifer pregnancy. She adds a +1.20 marbling EPD to top it off.

These Annuity cattle are high octane growth cattle. This heifer has an especially strong EPD for carcass weight, which is ultimately what most cattle in Nebraska get paid on.

Charolais Open Females

She had the 3rd largest weaning weight in the crop and a 108 ratio. We then culled heifers that didn't meet our quality standards for the sale. She went on to ratio 103 against the stiff competition of the sale heifers. We're waiting on some paperwork to complete to get her registered.

Here is a big-time feature who is bold and beautiful. She boasts a 115 weaning ratio and the 3rd largest yearling weight in the calf crop. Her dam stuck A.I. again as a wet two year old. She goes back to the famous WR Duchess Y601 cow. The best numbers in the sale for WW, YW, and CW EPDs, as well as TSI all belong to Lot 224. She is in the top 1% of the breed for Total Maternal. I expect to see her in someone's donor pen. This is the kind of opportunity that only comes along in a dispersion.

Big spread heifer who ratioed 109 at weaning. Her dam is sired by Z610's son Swager and is one of our best young cows. Lot 226 combines a top 15% of the breed BW EPD with a top 25% WW EPD. We expect her to have excellent teat size and udder suspension, and she is in the top 1% of the breed for milk and total maternal.
